2.1	Real Time	2
2.2	Processor Time	2
3	Recommendations on Choice and Use of Available Routines	2
4	Routines Withdrawn or Scheduled for Withdrawal	2

1 Scope of the Chapter

This chapter provides routines to obtain the current real time, and the amount of processor time used.

2 Background to the Problems

2.1 Real Time

Routines are provided to obtain the current time in two different formats, and to compare two such times.

2.2 Processor Time

A routine is provided to return the current amount of processor time used. This allows the timing of a particular routine or section of code.

3 Recommendations on Choice and Use of Available Routines

Note. Refer to the Users' Note for your implementation to check that a routine is available.

X05AAF returns the current date/time in integer format.

X05ABF converts from integer to character string date/time.

X05ACF compares two date/time character strings.

X05BAF returns the amount of processor time used.

4 Routines Withdrawn or Scheduled for Withdrawal

None since Mark 13.
